

YOUR SETUP GUIDE

Launch your first WhatsApp AI agent

Donna lives inside your WhatsApp, answers customers in seconds, and books them in — day or night. This guide takes you from login to your first live campaign in about 15 minutes. No technical skills needed.

Prepared for: _____ · Login: dm.voxdonna.com · Help: hello@voxdonna.com

BEFORE YOU START

How Donna works, in one minute

Three words to know. Once these click, the rest is easy.

Campaign	Your agent. It holds Donna's instructions, the channels she listens on, her follow-ups, and her triggers. Nothing happens until a campaign is live.
Channel	Where she talks — your WhatsApp number, connected by scanning a QR code. (Instagram, Messenger, web chat and SMS work too.)
Credits	Fuel for her AI replies. Your plan includes a monthly amount; a typical conversation is a few credits. Auto-recharge tops you up so she never goes quiet.

Two kinds of agent

INBOUND

She answers people who message you

Someone messages your WhatsApp first. Donna replies instantly, answers questions, and books the appointment. Best for support, website enquiries, and ad clicks that land in your DMs.

OUTBOUND

She messages your list first

You upload a list of contacts and Donna opens the conversation — promotions, re-engaging old customers, event invites. When they reply, she takes over and closes.

The fastest path

Most people use one agent that does **both**

(a "Combined" campaign). Start there — you can always split them later.

STEP 1

1. Log in

- 1 Open the welcome email from **Voxdonna**. It contains your login email and a temporary password.
- 2 Go to `dm.voxdonna.com` and sign in.
- 3 Set a new password when prompted (Settings → Security).
- 4 You'll land on your **Dashboard**. The left sidebar is your menu: Dashboard, Chats, Contacts, Campaigns, Appointments, Settings, and **Setup Wizard**.

Tip

Didn't get the email? Check spam, then ask us at hello@voxdonna.com to resend it.

STEP 2 — THE EASY WAY

2. Run the Setup Wizard (≈ 5 minutes)

The wizard builds your first agent for you. On first login it starts automatically — or click **Setup Wizard** in the sidebar any time.

- 1 **Pick your industry** — clinic, salon, real estate, ecommerce, coaching, agency, etc. This tailors Donna's tone.
- 2 **Pick your goal** — book appointments, follow up on leads, answer support, or re-engage past customers.
- 3 **Enter your website** — Donna reads it and writes her own instructions and FAQs automatically. Review them; tweak anything that doesn't sound like you.
- 4 **Connect WhatsApp** — scan the QR code with the phone that has your WhatsApp. (Details in Step 3.)
- 5 **Set follow-ups** — how long to wait and what to say if someone goes quiet.
- 6 **Review & go live** — the wizard creates your campaign and switches it on.

That's a working agent.

If you used the wizard, you can skip to Step 5 (Test & launch). Steps 3–4 show how to build agents by hand for full control.

STEP 3

3. Connect your WhatsApp

- 1 Go to **Settings** → **Channels** → **Channels** and choose **WhatsApp**.
- 2 A **QR code** appears. On your phone, open WhatsApp → **Linked Devices** → **Link a Device**, and scan it. (Same as WhatsApp Web.)
- 3 Keep that phone online and connected to the internet — Donna rides your existing number.

Important — protect your number

If you're connecting a
brand-new SIM

that has never received WhatsApp messages, text it from a personal phone 3–5 times and wait a few hours before connecting. Then ramp up slowly. New numbers that blast messages on day one get banned. Established numbers you already use are safe.

Want higher volume with no warm-up? The official WhatsApp Business API is also supported — ask us and we'll help you set it up.

STEP 4 · OPTION A

4A. Build an INBOUND agent

Donna replies to anyone who messages your WhatsApp first.

- 1 Go to **Campaigns** → **Create Campaign**.
- 2 Name it (e.g. "Front desk") and set the type to **Incoming from Unknown Contacts** — or **Combined** if you also want outbound.
- 3 Open the **AI Instructions** step and fill in:
 - **Who she is** — "You are Donna, the booking assistant for [business]."
 - **Her goal** — be specific: "Book a consultation," not "help customers."
 - **Hard rules** — e.g. "Never quote exact prices; offer to book a call instead."
 - **Company info** — hours, services, location, what makes you different.
 - **When to call a human** — "If they ask for a refund or sound upset, alert the team."
- 4 Set the feel: **response delay 5–30 seconds** (never instant — that screams "bot"), AI quality on the higher setting, max ~20 messages per chat.
- 5 Add **5–10 FAQs** (price ranges, parking, what to bring). Donna pulls the right answer instantly.
- 6 **Route your WhatsApp channel to this campaign** (in the campaign's channels step). This is what makes it go live — a campaign with no channel does nothing.

Test before you trust

Use "Try out the AI" in the campaign to chat with Donna, then message your own number from another phone to see the real thing.

STEP 4 · OPTION B

4B. Build an OUTBOUND agent

Donna messages a list of contacts first, then handles every reply.

- 1 Go to **Campaigns** → **Create Campaign** and set the type to **Outgoing** (or **Combined**).
- 2 Write the **AI Instructions** (same as inbound) so she knows how to handle replies.
- 3 **Upload your contacts** — Contacts → Import. A simple spreadsheet with first name and phone number (with country code, e.g. `+44...`).
- 4 Write your **opening message** — short, personal, with a clear reason to reply. Use `{{first_name}}` so it's personalised.
- 5 Turn on the trigger "**send to new contacts added to this list**" and route your WhatsApp channel to the campaign.
- 6 **Start small.** Send to ~100 contacts first, watch the reply rate, refine the opener, then scale up.

Go slow on a new number

Build up over a few weeks — a fresh number sending hundreds of cold messages on day one is the fastest way to a ban. Keep follow-ups off until your number is warmed up.

The 24-hour rule

Once a contact replies, a 24-hour window opens and Donna can chat freely about anything. That's where she does her real work — qualifying and booking.

STEP 5

5. Launch & watch it work

- 1 **Switch the campaign on.** Donna starts replying the instant a message lands.
- 2 Open **Chats** to see live conversations. Jump in any time — click **Hand off** to take over, and Donna steps back.
- 3 Watch the **Dashboard**: messages sent, delivered, read, replied, and appointments booked.
- 4 Check **Appointments** for everything she's booked into your calendar.

Keep her running smoothly

- **Credits:** turn on auto-recharge (Settings → Billing) so Donna never stops mid-conversation.
- **Human alerts:** you'll be notified when Donna flags a chat for a person.
- **Improve weekly:** read real conversations, then tighten her instructions and FAQs.

QUICK FIXES

If something's not working

Donna isn't replying	Check the campaign is live and your WhatsApp channel is routed to it . A connected channel with no campaign does nothing.
Messages stopped sending	Make sure the linked phone is online, and check your credit balance (Settings → Billing).
She replies too fast / robotic	Raise the response delay to 10–30 seconds and set AI quality to the higher tier.
Outbound message didn't go out	New numbers are rate-limited while warming up — this is normal and protects you from bans. Send smaller batches.
A chat needs a person	Open Chats , click Hand off , and reply yourself. Donna keeps the full history.
